

Batteries for Trucks, Buses, Construction, Agriculture

Polarity

Diagram showing the battery pack assembly with polarity markings. The positive terminal is indicated by a '+' sign and the negative terminal by a '-' sign. The terminals are labeled 1 through 12.

Terminal Type

Diagram showing the terminal types for the battery pack. The positive terminal is labeled 3.8-18UNC and the negative terminal is labeled 5.16-18UNC. The diameter is specified as $\varnothing 17.5$ for the positive terminal and $\varnothing 15.9$ for the negative terminal. The height is specified as 17 for both.

Hold Down

Diagram showing the hold down mechanism for the battery pack. The hold down is labeled 12 and the battery pack is labeled 11.
