

# Energy Policy

November 2021

## Purpose

Exide Technologies is committed to optimizing energy consumptions, to improve energy efficiency through continuous improvement methodologies. This will be achieved through full compliancy with country legal and legislative requirements and facilitate to improve the CO2 footprint efficiency.

This policy should be read in conjunction with the Energy Strategy document.

This will be achieved through:

- Making Energy a controllable event and elimination of all non-value added uses of energy
- Ensuring availability of documented information shared across the organization
- Having the necessary resources to continuously improve the energy efficiency and the EnMS
- Forecasting energy to increase control and planning capabilities, and reviewing actual consumption in line with forecast
- Providing regular settings and reviews of energy objectives and targets
- Encouragement of our workforce through their involvement in the project and its successes
- Supporting the purchase of energy efficient products and services, and design for energy performance improvement
