

Batteries for Marine and Leisure

Polarity

Diagram showing the polarity of the 10-pin connector. The positive terminal is indicated by a '+' sign and the negative terminal by a '-' sign. The diagram shows the internal layout of the pins and the corresponding polarity markings.

Terminal Type

Diagram showing the terminal types for the 10-pin connector. The positive terminal is labeled "Positive Terminal" and the negative terminal is labeled "Negative Terminal". The dimensions for the terminals are provided: 3.8 - 16UNC for the positive terminal and 5.16 - 16UNC for the negative terminal. The diameter of the terminal is specified as $\varnothing 17.5$ for the positive terminal and $\varnothing 15.9$ for the negative terminal. The height of the terminal is specified as 17 for both.
