

About Exide Automotive Division

The Automotive Division is a leading developer and manufacturer of 12V automotive batteries that are designed to facilitate the transition of internal combustion vehicles to full electric powertrains. Our batteries serve as 12V energy sources in a range of applications, including electric vehicles, hybrids, start-stop, and internal combustion powertrains.

Our innovative batteries are based on lead-acid technology in vented, EFB, AGM, Gel, and lithium-ion technology. Batteries from Exide power vehicles across various vehicle types, including light vehicles, commercial vehicles, buses, motorbikes, and they are also the reliable energy source for marine and leisure applications.

Exide's Automotive division plays a crucial role in the industry, and our reputation for premium technology and quality is why vehicle manufacturers rely on our OEM products. Exide also supplies the independent aftermarket with top brands such as Exide or Tudor, and offers added-value digital tools, accessories & services for aftermarket distributors and workshops.
