

We offer more batteries than ever before.

You'll constantly be restocking your shelves.

EXIDE[®] Automotive Batteries. **Start Positive. Stay Positive**[®]

SXIDE

EXIDE AUTOMOTIVE BATTERIES

Exide offers one of the most extensive lines of automotive and light truck batteries - with sizes and power levels to fit 97% of vehicles on the road today. Our expanding range of products and technologies enables you to present a variety of application solutions and quality tiers resulting in increased sales and greater customer satisfaction. Exide backs this product assortment with world-class sales support, service and distribution through our nationwide branch network.

Exide[®] Edge[™] AGM Batteries

Starts like new. Stays like new longer.™

LASTING ENERGY 17X More Energy for everything like repeated use of technology and shuttle driving¹

MAX DURABILITY Up to 15% More Starting Power, even in extreme temperatures²

FAST RE-CHARGE Recharges faster because of SureLife Graphite Technology, even under extreme conditions³

SPILL PROOF* Clean, safe, non-spillable, maintenance free AGM construction. Easy to install, even on its side**

Exide[®] Edge[™] batteries are the first and only absorbed glass mat (AGM) products* that feature SureLife® Graphite Technology to maximize available energy capacity - helping batteries perform at higher levels longer. Exide Edge provides more protection against battery failure, helping vehicles stay strong and perform like new.

¹ Based on average results of five batteries tested per the VDA 17.5% DOD; results are versus conventional flooded batteries. The test measured the number of times the tested battery turned over its capacity before failure when taken down to 17.5% depth of discharge. This is not life duration test, and does not mean the battery will last 17 times longer.
² 15% is the maximum average result for six Group 65 batteries tested at 90% state of charge in a Simulated Start Test. Results are versus conventional flooded batteries. Actual increases in starting power will vary, and will be less for some other Group Size batteries, and at different states of charge for Group 65 batteries.
³ Claims made versus conventional flooded batteries
* Under normal operating conditions

**Inverted not recommended

Exide® Conventional Batteries

Exide[®] Edge[™], Global Extreme[™], NASCAR[®] Extreme[™] and NASCAR[®] Select[®] batteries are proudly made in state-of-the-art US based manufacturing facilities.
