EXIDE MARINE BATTERIES

Introducing the Exide® Edge™ Starting AGM Battery.

When it comes to marine batteries, one size does not fit all, which is why Exide offers a full line of marine batteries that includes our Exide® Edge™ Starting AGM. Built with our exclusive Surelife® Graphite Technology, it is ideal for all marine applications where the constant stopping and starting of the engine are required. The Exide line of marine batteries offers power and reliability when your customers need it most, and durable performance when they are out on the open waters. So whether they're powering up a cabin cruiser or a bass boat, Exide has just the right battery for just about everybody.

Made in the USA with some imported components.

Start Positive. Stay Positive.®

Exide® Edge™ Marine AGM Batteries

Starts like new. Stays like new longer.™

Exide® Edge™ batteries are the first and only absorbed glass mat (AGM) products² that feature SureLife® Graphite Technology to maximize available energy capacity — helping batteries perform at higher levels longer. Exide Edge provides more protection against battery failure, helping boats stay strong and perform like new, for worry-free time on the water.

Starting AGM

with **SURELIFE®**
Graphite Technology

Dual Purpose AGM

MAX STRENGTH
Deeper discharge capability for stronger cycling over the lifetime of the battery.

RAPID RE-CHARGE
Designed for quick re-charge and recovery.

STARTING POWER
Strong starting and staying power so marine batteries stay strong and perform like new, day after day.

SPILL-PROOF*
Clean, safe non-spillable AGM construction.

MAXIMUM DURABILITY
Higher vibration resistance for decreased damage and corrosion.¹

DEEP CYCLE
Higher cycling endurance and maximized energy capacity from SureLife® Graphite Technology.¹

STARTING POWER
Strong starting and staying power so marine batteries stay strong and perform like new, day after day.

SPILL-PROOF*
Clean, safe non-spillable AGM construction.
