

MARINE BATTERIES

Megacycle® AGM 200

MEGACYCLE® AGM 200

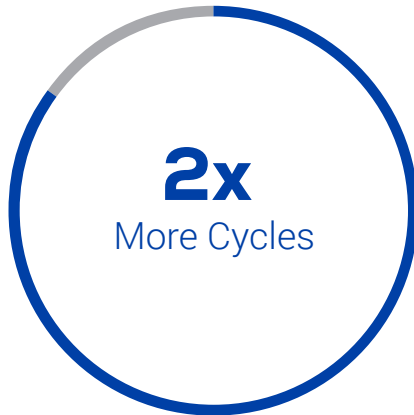

TODAY'S BOATS DEMAND MORE POWER THAN EVER

- › Spill-proof* AGM
- › 4.5x the vibration protection of a heavy duty anchor bonded product and 14x vibration protection compared to a standard product
- › 2x greater cycling ability at moderate depth of discharge levels (SAE j2185) and 3.4x greater cycling at deep discharge levels
- › Active material support by AGM separators allows for improved cyclability over flooded product
- › Low impedance design allows for 40% greater charge acceptance rate over a flooded design, allowing quicker recharge capability
- › Low self discharge rates allow for 60% greater shelf life than flooded types

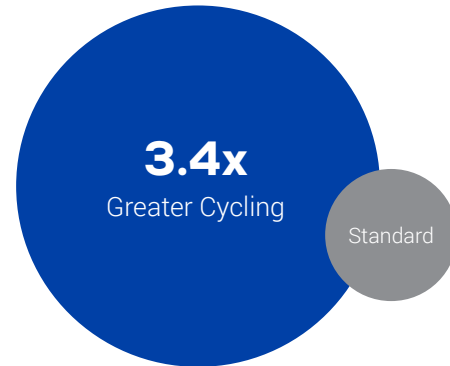

EXIDE® MEGACYCLE® AGM 200

Marine Absorbed Glass Mat (AGM)

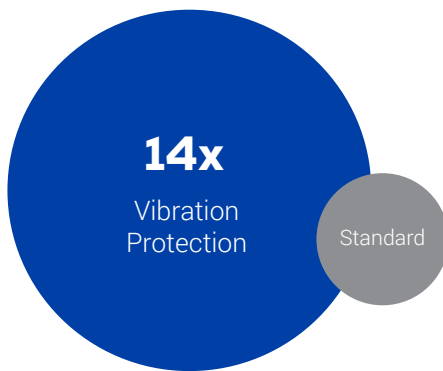

MORE CYCLES

Long periods of use and frequent start-ups typically wear on a battery's power. But not Exide's MegaCycle AGM 200. Built to withstand periods of heavy discharge, MegaCycle offers you confidence, knowing your boat will start time after time.

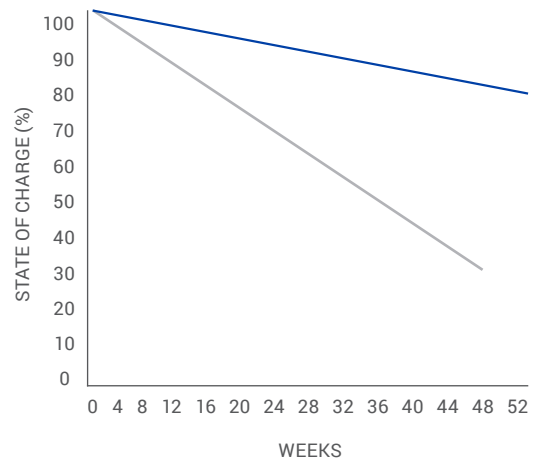

DEEPER CYCLES

Exide's MegaCycle AGM 200 is built for worry-free time on the water. Boaters sit for hours at a time, drawing power from their batteries with accessories like refrigerators and plasma screens. Exide's MegaCycle AGM 200 is the storage battery that offers deeper, better cycling.

VIBRATION PROTECTION

Nothing abuses a traditional battery like vibration. The MegaCycle AGM 200 is built to withstand even the worst of what the water dishes out. Its durable design minimizes damage and shock to remain intact, powerful and strong.

CHARGE RETENTION

By sitting idle for long periods of time or because of storage, inactivity has traditionally been a major cause of battery ineffectiveness. The MegaCycle AGM 200 is specifically designed to combat lack of use and even slow the symptoms of over-sulfation, all to keep your battery at the highest capacity.

■ MegaCycle AGM 200 ■ Conventional

EXIDE® MEGACYCLE® AGM 200

- A Over the top handle
- B High conductivity post
- C Robust, thick wall poly case
- D Increased post diameter / larger lead base
- E Lead / Calcium / Tin / Silver alloy
- F Absorbed glass mat separator
- G Tin alloy cast-on strap with special oval weld
- H Heavy, robust cast grids
- I SAE automotive or threaded posts
- J Special pressure venting system

POWER FOR THE MODERN BOATER

As modern boaters demand more power-hungry accessories, they need batteries that can stand up to the challenge. The Exide® MegaCycle® AGM 200 continues the tradition of high standards, backed by a strong nationwide warranty program and more than 100 years of innovation.

- › Air Conditioning
- › Heating System
- › Interior Lights
- › Running Lights
- › Large Capacity Refrigerator / Freezer
- › Music System with Multiple Speakers
- › Computer
- › GPS
- › Cell Phones
- › TV / Blu-ray
- › Fish Finder
- › Depth Finder
- › Hydraulics
- › Stove, Microwave, Coffe Pot, etc.
- › Satellite

FEATURES	Part Number	CCA at 0°	CA at 32°F**	RC MIN at 25A	Battery Terminal Type	Overall Dimensions Length x Width x Height
	› Spill - Proof* › Vibration resistant › Deep Cycle	XMC-31	925	1110	200	DUAL
› Starting Power › Reserve Capacity › Maintenance Free*	MC-31	700	840	200	DUAL	13 (330) x 6-5/8 (171) x 9-7/16 (233)

RECYCLE WITH EXIDE.

EXIDE TOTAL BATTERY MANAGEMENT (TBM)

Exide is one of the largest secondary lead recyclers in the world, and one of the few companies with the ability to provide Total Battery Management, helping to divert batteries from the waste stream by returning the recycled materials to new products. Our commitment to recycling and environmental responsibility is unwavering.

Made with some imported components
