

HEAVY DUTY BATTERIES

RoadForce® AGM 200

POWERING THE
WORLD FORWARD

ROADFORCE® AGM 200

TODAY'S TRUCKS DEMAND MORE POWER THAN EVER

- › Spill-proof* AGM
- › **4.5x the vibration protection** of a heavy duty anchor bonded product and **14x vibration protection** compared to a standard product
- › **2x cycling ability** at moderate depth of discharge levels (SAE j2185) and **3.4x greater cycling at deep discharge levels**
- › Active material support by **AGM separators allows for improved cyclability** over flooded product
- › Low impedance design allows for **40% greater charge acceptance rate over a flooded design**, allowing quicker recharge capability
- › Low self discharge rates allow for **45% greater shelf life** than flooded types

EXIDE® ROADFORCE® AGM 200

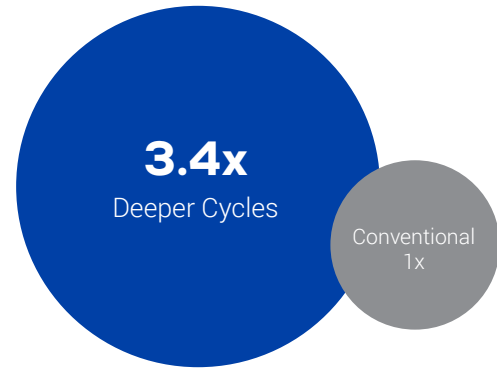

Heavy Duty/Commercial Absorbed Glass Mat (AGM)

MORE CYCLES

Long periods of use and frequent start-ups typically wear on a battery's power, but not Exide's Heavy Duty RoadForce AGM-200. Built to withstand periods of heavy discharge, RoadForce offers you confidence, knowing your truck will start time after time.

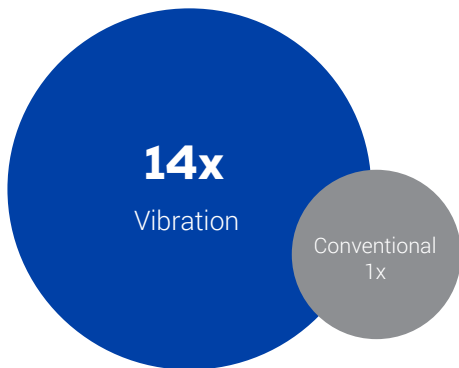

■ Road Force® AGM 200 ■ Conventional Flooded

DEEPER CYCLES

Exide's Roadforce AGM-200 is built to keep truckers going, even when they're not on the road. The current no-idle laws restrict truckers from running their engines to power their overnight comforts – from microwave ovens to DVD players. Exide's Heavy Duty RoadForce AGM-200 is the heavy duty storage battery that offers deeper, better cycling to keep you going all day and all night too.

■ Road Force® AGM 200 ■ Conventional Flooded

VIBRATION

Nothing abuses a traditional battery like vibration. RoadForce AGM-200 is built to withstand even the worst of what the road dishes out. Its durable design minimizes damage and shock to remain intact, effective and going strong.

CHARGE ACCEPTANCE

Due to the combination of environmental regulations and higher fuel costs, idling has been severely restricted for commercial vehicles. As a result, more starts at more frequent intervals are required – with less recharge time between starts. These conditions require a battery which will accept recharging much more quickly and efficiently. RoadForce AGM-200 will accept charge 40% faster than conventional flooded batteries, making it ideal for the new operating environment.

EXIDE® ROADFORCE® AGM 200

- A Over the top handle for easy installation
- B High conductivity post for high cranking capability
- C Robust, thick wall poly case reinforces component stability
- D Increased post diameter for superior current carrying capacity
- E Lead / Calcium / Tin / Silver alloy for superior life under extreme operating conditions
- F Absorbed glass mat separator assuring stability under extreme vibrations and high cycling operations
- G Tin alloy cast-on strap with special oval weld for prolonged battery life
- H Heavy, robust cast grids for enhanced corrosion resistance
- I Special pressure venting system for increased life

HEAVY DUTY POWER FOR THE LONG HAUL, SHORT HAUL AND EVERYTHING IN BETWEEN

With anti-idle laws growing across the country and increasing power demands from truck accessories, you need a battery that can stand up to the challenge. The RoadForce® AGM 200 continues the tradition of high standards, backed by a strong nationwide warranty program and more than 100 years of innovation.

RECYCLE WITH EXIDE.

EXIDE TOTAL BATTERY MANAGEMENT (TBM)

Exide is one of the largest secondary lead recyclers in the world, and one of the few companies with the ability to provide Total Battery Management, helping to divert batteries from the waste stream by returning the recycled materials to new products. Our commitment to recycling and environmental responsibility is unwavering.

Made with some imported components
